

*“The Phoenix Lights is a compelling and thoroughly documented account of the most bizarre and widely observed UFO event in modern times.”*  
 Dr. Edgar Mitchell, Sc.D Capt USN (ret), Apollo Astronaut

During the evening of March 13, 1997, thousands of Arizona residents witnessed a silent mile long V-shaped formation of lights slowly gliding overhead. The unexplained sightings garnered headline news, catching the attention of USA Today, EXTRA, CNN, national morning TV shows, and even the evening news with Peter Jennings, Dan Rather and Tom Brokaw.

One person, however, was not at all surprised by the appearance of the lights in the sky. **Lynne D. Kitei, M.D.** was simply grateful that a phenomenon she'd been witnessing and documenting on film for months was being validated by the experience of thousands of people statewide.

After the incident, Dr. Lynne preferred to stay in the background, anonymously feeding information and video clips to the many news organizations who wanted in on the story. After pushing her successful medical career aside for seven years, Dr. Lynne recently came forward to tell her own story.

**The Phoenix Lights...A Skeptic's Discovery That We Are Not Alone** best selling book and internationally award winning Documentary project, is a meticulously researched and groundbreaking endeavor, which includes astonishing photographic evidence, the media, government, military and witness reactions to the still unexplained event, as well as the wider implications of these worldwide enigmatic phenomena.
